

Establish
effective
stock
control

- 1. Use the FiFo system:** Always put the freshest products behind the old ones
- 2. Optimise delivery** arrangements with suppliers
- 3. Minimise cross contamination** and excessive food waste by organising your store cupboards and refrigerators
- 4. Organise your stock** by the purchasing list of your supplier it will save you precious time when re-ordering
- 5. Determine your pick frequencies:** It is smart to put products with a high pick frequency at the beginning of your route
- 6. Use the ABC-strategy** to optimise the space of your storage
