

Tackle
waste and
reduce
expense

- 1. Save and recycle** good plastic or even glass containers
- 2. Be committed:** The best way is to prevent creating waste in the first place
- 3. Set up a selective waste sorting system** to make recycling easy
- 4. Can you make money from your waste?** Waste oil and fat can be sold to processing companies, find out if any are in your area
- 5. Get your food waste collected for anaerobic digestion or composting,** as an alternative to being sent to landfill
- 6. Work with your suppliers to minimise packaging:** Send the delivery driver back with unwanted boxes and packaging
